ARCTIC KNIGHT® COLD WEATHER PUMP PACKAGE

Leave Us Out In The Cold. We've Got It Covered.

Thompson Pump's Arctic Knight® provides a comprehensive cold weather diesel-driven pump package. Available on a variety of pump models, the Arctic Knight® features a cold weather enclosure and auto pump drain system which allows pumps to operate trouble-free in severe climates as cold as -40° celsius.

Unique Features

- The Thompson Arctic Knight® provides all of the features of the Thompson Pump Silent Knight® plus additional equipment including:
 - Thermostatically controlled space heater.
 - Auto-drain valve kit to constantly drain the pump and hoses.
 - Built-in 120 volt battery charger or optional solar charger.
- Eliminates need for accessories such as: block heaters, fuel heaters, thermal blankets, glow plugs, coolant heaters, radiator louvers and pump casing heaters.
- Eliminates all problems associated with frozen liquids, manual draining, engine starting, and cracking of pump casings.
- Highly efficient climate control system.
- Withstands driving winds and heavy snow drifts.
- Optional skid runners for pulling the unit across rough, frozen terrain.
